Midi-Baccarat

This classic game originated in France over 500 years ago and is a modified version of Baccarat.

OBJECT OF THE GAME

To predict which hand will have a point value closest to nine (9).

HOW TO PLAY

In Midi-Baccarat, there are three possible outcomes to wager on, the player hand, the banker hand, or the tie. The cards are dealt face up in front of the dealer, two cards for the banker hand and two cards for the player hand. Individual players do not receive any cards.

The player hand and the banker hand are each dealt two initial cards. Based on the individual point totals of the player hand and the banker hand, a third card may be dealt. See details in "Third Card Rule" section on facing page. The hand with the point value closest to nine (9) wins. To determine point value, cards in the hand are added together and the last digit is used to declare the winner (e.g. $8 + 8 = 16$, total of the hand = 6).

THE CARDS

- * Face cards (Kings, Queens, Jacks) and tens count as 0
- * Aces count as 1
- * All other cards are counted at face value

PAYOUT

- Player Hand** Pays even money (1 to 1)
- Banker Hand** Pays even money less 5% commission
- Tie** Pays 8 to 1

THIRD CARD RULE

Player Hand

*When the first two cards of the player hand or banker hand total 8 or 9, neither receives a third card.

* When the first two cards of the player hand total 6 or 7, the player hand does not get a third card.

* When the first two cards total 0 through 5, the player hand gets a third card.

Banker Hand

* The banker hand plays under the same rules as the player hand except when both the bankers hand first two card total 3,4,5 or 6 and when the player hand takes a third card. In that event, the following rules apply.

When the banker's first two cards total:

3
4
5
6

Banker takes a third card if the third card of the player is...

not a 8
2 through 7
4 through 7
6 or 7
